OX SHIELD

surface protection by **OX**

Ox Shield is designed to provide temporary surface protection in the construction industry. This heavy-duty, high strength cellulosic fiber board is engineered to protect new and existing floors and surfaces from the demands of the jobsite. Ox Shield is easy to install and is reusable making it ideal for your next build. It's the perfect solution when protecting new or existing concrete, wood, tile, stone, linoleum, epoxy and most other surfaces.

Made in the USA 

Ox Shield Features

Impact Resistant

Protects your surface with unmatched strength

Spill Protection

Provides protection against water, paint, mud and more.
